**West Bengal, India**

**Join!**

**Sponsored by: MoEF & CC, Govt. of India**

**Join!**

Welcome Address: Prof. (Dr.) Ashis K Panigrahi, Coordinator, ENVIS RP, KU.

Inaugural Address: Prof. (Dr.) Sankar Kumar Ghosh, Hon'ble Vice Chancellor, KU.

Speaker-1: Effect of Covid-19 on Environment (Prof. Nimai C. Saha, Hon'ble Vice Chancellor, B.U.)

Speaker-2: Status of Biodiversity in India (Dr. A. K. Sanyal, Chairman, WB Biodiversity Board)

Speaker-3: Biodiversity of Antarctica (Dr. Anant Pande, WII, Team member Antarctica Expedition)

Speaker-4: Corona Pandemic effect on Biodiversity (Dr. Neera Sen Sarkar, Dept. of Botany, KU.)

Speaker-5: Mangrove Biodiversity (Dr. P. Chaudhury, Dept. of Env. Sc, CU)

Speaker-6: Biotechnology boosts biodiversity conservation (Dr. S.Nayak, Odisha Biodiversity Board)

Speaker-7: Concluding & Vote of Thanks (Dr. Anusaya Mallick, P.O., ENVIS RP, KU.)

## Invitation

The poster features a central image of a blue and orange bird perched on a mossy log. The background is a soft-focus green. Text is arranged in a structured layout with various colors and fonts. Logos for the University of Kalyani and the Department of Environment & Sustainable Living are present. A blue box on the left contains the date and time. The right side contains details about the event's theme and venue. The bottom of the poster has contact information.

## Aim of the Webinar

Webinars are events held 100% online. This enables you to reach a large and specific audience. Members of the target group participate live via a PC, Mac, tablet or smartphone, wherever they are. And if they are unable to join the webinar live, they can watch the recorded broadcast afterwards instead. This webinar is organised in the framework of the coronavirus disease (COVID-19) outbreak. Seven months into the discovery of the COVID-19 virus in Wuhan, almost half of humanity is under lockdown. Thousands of events were cancelled worldwide due to the Corona virus and in a COVID-ridden world; gatherings of any kind can be very dangerous for all parties. The epitome of convenience, a webinar is one of the easiest ways to participate in an official discussion or a productive session.

The Web seminar on Care to Biodiversity was organized on the occasion of World Environment Day. As this year the Environment day theme is Biodiversity. From this web seminar we enriched about the biological diversity of plants and animals and its environmental aspects. The biodiversity is decreasing day by day due to various reasons. If it does not stop then our earth could no longer be a place to live in. Therefore different

measures help in increasing the biodiversity of the earth. Biodiversity in flora and fauna is the need of the hour. Therefore we should take various countermeasures to stop the reduction of endangering of species. Furthermore, pollution from vehicles should decrease. So that animals can get fresh air to breathe. Moreover, it will also decrease global warming which is the major cause of the extinction of the species. Biodiversity is an issue that affects everyone and therefore everyone should be aware of their effect on biodiversity. The continuous decreasing of the biodiversity will be threats to the future human survival. Therefore, we should care to the Biodiversity.

Due to COVID-19 pandemic the DESKU ENVIS Resource Partner on Environmental Biotechnology, University of Kalyani, Supported by Ministry of Environment, Forest and Climate Change (MoEF & CC), Govt. of India, New Delhi, was organized the WEBINAR on CARE to BIODIVERSITY on the occasion of World Environment Day, 5<sup>th</sup> June, 2020 at 11.30 am-1.30 pm.

### **Inauguration of the Webinar**

The **Webinar on Care to Biodiversity** was inaugurated on the occasion of World Environment Day, 5<sup>th</sup> June, 2020 at 11.30 A.M. by our Hon'ble Vice Chancellor, University of Kalyani Prof. Sankar Kumar Ghosh, and other distinguished dignitaries. Prof. Ashis Kumar Panigrahi, Coordinator ENVIS Centre, Head, Dept. of Zoology, Dr. A.K. Sanyal, Chairman, West Bengal Biodiversity Board, Dr. Dr. Anant Pande, Scientist Wildlife Institute of India, Dehradun Uttarakhand, India, Dr. Neera Sen Sarkar, Dept. of Botany, K.U, Dr. Punarbasu Chaudhuri, Dept. of Environmental Science, University of Calcutta and Dr. Shubhransu Nayak, Odisha Biodiversity Board.

On the occasion of the World Environment Day, 5<sup>th</sup> June, 2020 keeping the view of the worlds present situation Hon'ble Vice Chancellor released **ENVIS news letter on Biotechnological and Environmental Aspects of COVID-19 (ISSN:09742476, Vol-36, 1)**

**Released of ENVIS news letter**

**ENVIS news letter on Biotechnological and Environmental Aspects of COVID-19**

**(ISSN: 09742476, Vol-36, 1)**

## Welcome Address

**WELCOME TO THE WEBINAR on CARE to BIODIVERSITY**

**Welcome Address By:**  
**Prof. (Dr.) Ashis K Panigrahi**  
**Coordinator, ENVIS RP**  
**University of Kalyani**

**Organised by: ENVIS RP on Environmental Biotechnology,**  
**University of Kalyani**

### From the Desk of:

**Coordinator, DESKU ENVIS RP on Environmental Biotechnology,  
University of Kalyani**

It is my great pleasure to welcome the experts and participants of WEBINAR on CARE to BIODIVERSITY. Due to COVID-19 pandemic the DESKU ENVIS Resource Partner on Environmental Biotechnology, University of Kalyani, Supported by Ministry of Environment, Forest and Climate Change (MoEF & CC), Govt. of India, New Delhi, is organizing this Webinar on the occasion of World Environment Day 2020. At the outset, of this webinar as Coordinator of ENVIS Resource Partner, I would like to express our warmest gratitude, on behalf of ENVIS Resource Partner, to our Hon'ble Vice-Chancellor, Professor (Dr.) Sankar Kumar Ghosh, University of Kalyani and Ministry of Environment, Forest and Climate Change (MoEF & CC), Government of India, New Delhi.

ENVIS RP on "Environmental Biotechnology" University of Kalyani, was established in June, 2002 and it is running under the leadership of our honourable Vice Chancellor, Prof. Shankar Kr. Ghosh. I am trying my level best with my ENVIS team to work sincerely with

its objectives to collect primary as well as secondary data on bio-technology, biodegradation, management of natural resources as well as hazardous waste management to combat environmental pollution.

To spread awareness among the people, the centre is also continuously publishing different Newsletters based on current environmental issues, Case studies, Special Books, Mobile Apps, Leaflets, Abstract Volumes, Knowledge-based product CDs, Videos etc. on different programmes. Further, we regularly celebrate Special days i.e. Environmental day, Aranya Saptaha, Wetland day, Yoga day, Ozone day, Swachh Bharat etc. to create awareness among the people on different current environmental issues.

Recently this year new initiative has been taken by our centre as per the instruction of MoEF&CC for preparation of Environmental District wise GIS based grid map of West Bengal. Further, the Green Skill Development Programme (GSDP) in various topics were started by our centre from 2018. The Green skills contribute to preserve or restore environmental quality for sustainable future including job creation to protect ecosystems and biodiversity, and minimizing waste through recycling.

World Environment Day is held each year on June 5. It is one of the principal vehicles through which the United Nations (UN) stimulates worldwide awareness of the environment and enhances political attention and action. This year the theme of World Environment Day 2020 is “Celebrate Biodiversity”. “With 1 million species facing extinction, there has never been a more important time to focus on biodiversity.” World Environment Day can be celebrated in many ways; activities such as campaign clarification, sensitizing the locals about the growing environmental conditions and suggesting ways to prevent them, organizing plays, quizzes, tree plantations, lectures and kids poster competition, etc. are quite popular.

Biological diversity, or biodiversity, is the scientific term for the variety of life on Earth. It refers not just to species but also to ecosystems and differences in genes within a single species. Everywhere on the planet, species live together and depend on one another. Every living thing, including man, is involved in these complex networks of interdependent relationships, which are called ecosystems. Biodiversity is the key indicator of the health of an ecosystem. A wide variety of species will cope better with threats than a limited number of them in large populations. Even if certain species are affected by pollution, climate change or human activities, the ecosystem as a whole may adapt and survive. But the extinction of a species may have unforeseen impacts, sometimes snowballing into the destruction of entire ecosystems.

The COVID-19 pandemic is a crisis that affects everyone. With the COVID-19 pandemic causing the death of lakhs of people and forcing economic and social lockdowns across nations. All countries need to act in concert with each other to succeed in order to protect not just the planet, but ourselves, our economies and everything. The COVID19 crisis has deep roots in how we interact with, manage, and conserve biodiversity.

The emergence of COVID-19 has underscored the mutually-affective relationship between people and nature. Now, we must try to understand and appreciate the limits to which humans can push nature, before the impact is negative.

So, this webinar is very much relevant to our ENVIS RP as the main objective of this seminar is based on biodiversity.

Last but not the least, I can say this webinar is very much appropriate with present day need. Galaxy of national/ international scientists will deliver the web lecture relevant to this topic in this webinar and no doubt some suitable recommendations will come out which help to conserve the biodiversity to save our mother earth. The participants must enriched by the seminar.

Lastly, I wish the webinar a grand success.

Thanking you all

Prof. (Dr.) Ashis Kumar Panigrahi

Coordinator ENVIS RP on Environmental Biotechnology

University of Kalyani, Kalyani

Nadia, West Bengal

## **Inauguration**

**WEBINAR on CARE to BIODIVERSITY**

**Inaugural Address By:**  
**Prof. (Dr.) Sankar Kumar Ghosh**  
**Hon'ble Vice Chancellor**  
**University of Kalyani**

**Organised By: ENVIS RP on Environmental Biotechnology,**  
**University of Kalyani**

### **From the Desk of:**

**Hon'ble Vice-Chancellor, Professor (Dr.) Sankar Kumar Ghosh,**  
**University of Kalyani**

Distinguished resource persons and my dear participants, Good Morning to all.

It is a great pleasure for me to address you in the inaugural session of the web seminar as the head of the institute like Kalyani University. I am very pleased to be here today for the opening of this Webinar on CARE to BIODIVERSITY on the occasion of World Environment Day 2020. The ENVIS Resource Partner on Environmental Biotechnology, University of Kalyani, Supported by Ministry of Environment, Forest and Climate Change (MoEF & CC), Govt. of India, New Delhi, is organizing this Webinar in the recent world crisis situation. The proposal to conducting of this web seminar was proposed by ENVIS Coordinator and staffs due to COVID-19 pandemic lockdown period. In this situation we cannot gather in one place to obey the Govt. protocol. So I gladly gave the permission to organize the seminar in online and it was come into bigger way throughout the globe.

The ENVIS-RP is the proud of this University and an iconic centre on the theme Environmental Biotechnology in the country under MoEF & CC. The ENVIS RP does a wonderful work to the society through different Environmental awareness activities, publications, Mobile Apps, Web information, Knowledge-based product, seminar, workshop, hands on trainings, celebrating special days even skill development programme in various corner like tissue culture and other parts.

Recently ENVIS RP has taken new initiative for preparation of District wise GIS based grid map on different Environmental parameters of West Bengal and Green Skill Development Programme (GSDP) in various topics as per the instruction of MoEF&CC. The Green skills contribute to preserve or restore environmental quality for sustainable future including entrepreneurship development, job creation to protect ecosystems and biodiversity.

World Environment Day celebrated every 5<sup>th</sup> of June today is the biggest annual event in the world coined through United Nations Environment Programme (UNEP) to mark the environmental awareness among the people. Its main aim is to raise awareness to protect our nature and look at various environmental issues that are growing day by day. For healthy living, environment plays an important role and it provides us air, water, food, etc. Environment is just like our neighbourhood; its surrounding conditions influence us and modify growth and development. It is one of the main prime actions to protect our environment.

This year the theme of World Environment Day 2020 is “Celebrate Biodiversity” hosting in Colombia in partnership with Germany. Biodiversity is the variation of Earth’s terrestrial, freshwater, and marine species, as well as their habitats. Biodiversity is vital to the survival of all life on earth and is also the cornerstone for the goods and services of the environment that allow human societies to thrive. There are lots of species in the world and they have every right to survive in the earth. Biodiversity provides us with food, water and resources as well as services such as climate control, pollination, flood mitigation and cycling of nutrients. Protecting biodiversity means protecting to the human race and human habitat. Human action including deforestation on wildlife habitats, intensified agriculture, acceleration of the climate change and offset the delicate balance of the nature. We have changed the system that could naturally protect us and that have created conditions that allow particular pathogens including of Corona virus to spread. Today it is estimated that globally millions of disease and deaths occurred due to the present Corona virus which is called Covid-19 provides us an opportunity to both revisit our relationship with nature and rebuild a more

environmentally responsible world. So this Corona virus and the global perspective we have transformed ourselves in such away in near future that we can sustain us and protect our biodiversity.

Yet, these are exceptional times in which nature is sending us a message. Nature is showing that we are on the verge of a breakdown. It's time to wake up and stabilize our relationship with nature. It's time to raise our voices to tell the world that we need action now.

So, this webinar is very much relevant to the present situation of the society.

I wish you all success and hope that the scientific discussions in each of the sessions would enrich us to build our approach.

Specially thanks to the ENVIS Coordinator Prof. Panigrahi and the ENVIS staffs for their continuous effort in the crisis period to organizing the Webinar. I am also grateful to the eminent speakers. Thanks to the ENVIS Secretariat and MoEF & CC for their support.

Lastly, I wish the webinar a great success.

Thanking you all

Professor (Dr.) Sankar Kumar Ghosh

Vice Chancellor

University of Kalyani, Kalyani

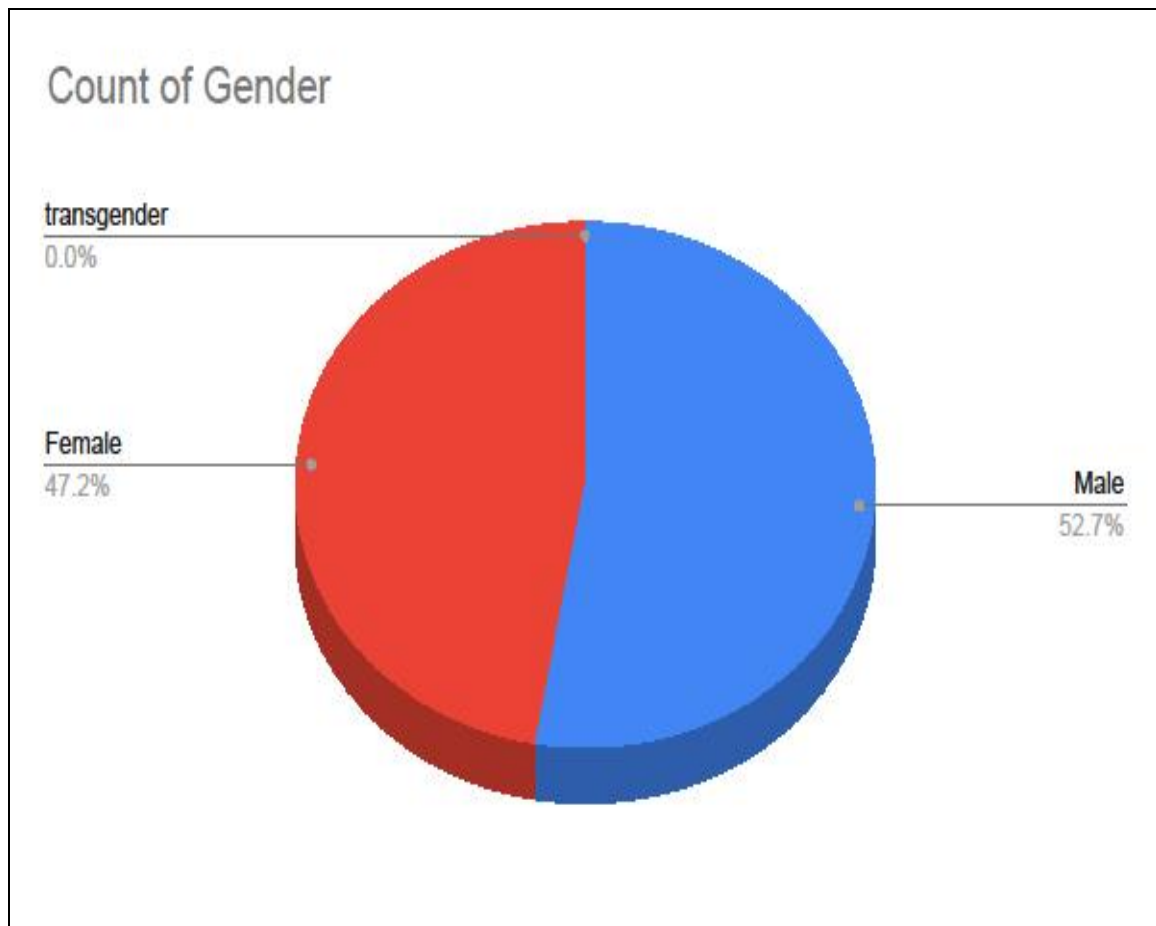

Nadia, West Bengal

## Participant details

A total of **2124 participants** were registered in the programme, but **1870 participants** were selected for participation. In the webinar **3049 participants** were viewed live in **YouTube** (total **3,737** viewers that day) and over **125 participants** viewed in **Facebook** simultaneously. The participants are comprises of **47.2% female** and **52.7% male** from all over the world, majorities from Asian countries and some are from USA, Europe and Australia were actively participated in the seminar (Indian viewers **95.1%**). Among the participants about **61% are students** of UG & PG and rest are academicians like faculties, scientists, doctors, teachers, administrative persons etc.

### Lecture-I

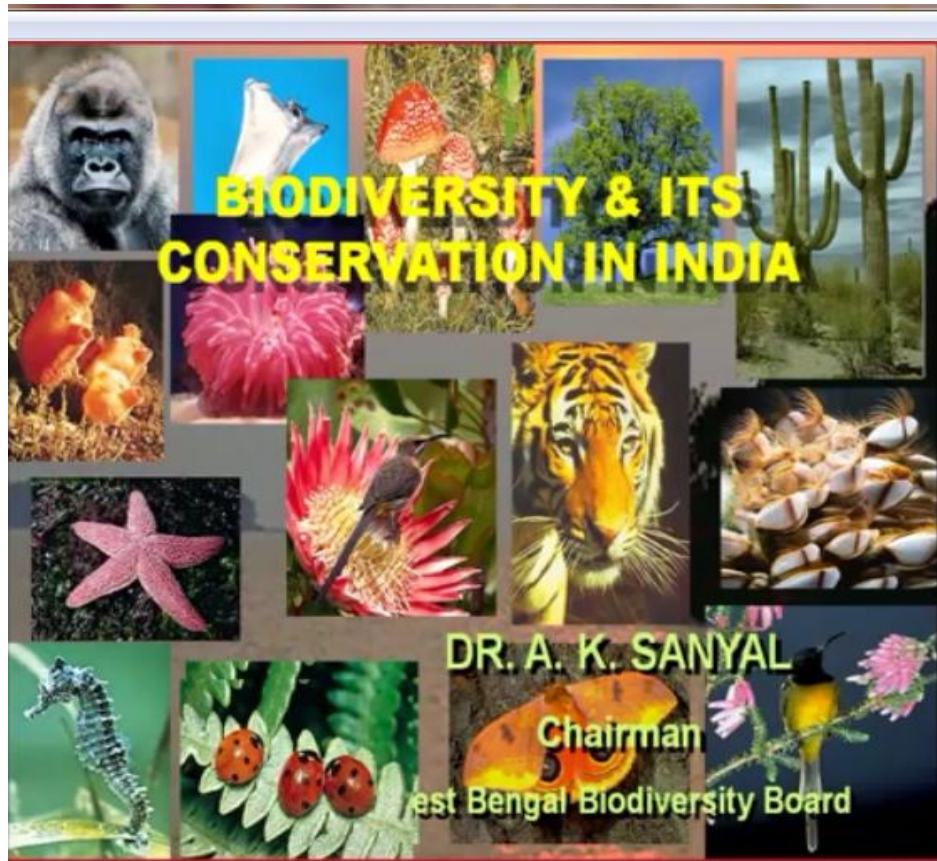

**Dr. A. K. Sanyal**

**Chairman West Bengal Biodiversity Board, West Bengal**

**Topic: Biodiversity and its Conservation in India**

Biodiversity is the pillar that allows ecosystem to function and human thrive. Biodiversity influences the ecosystem services and it is the foundation of the earth. India is one of the 17 Mega diverse countries and is composed of a diversity of ecological habitats like forest, grassland, wetlands, costal and marine ecosystems and desert ecosystems. Avobe 40% of the world's economy and 80% of the needs of the poor are met by biological resources. India has currently 4.79% of total geographic area under an elaborate network of Pas, Which includes 18 Biospere reserves, 104 National Parks, 551 Wildlife sanctuaries, 88 Conservation reserves, 127 Community reserves and 12 Biodiversity heritage sites. In his conclusion he told that Biodiversity is our life, if biodiversity got lost the survival of human being will be threatened. So it is time to balance our consumption with the needs of nature and to protect the only planet that is our home.

## Lecture-II

**Dr. Anant Pande**

**Scientist, Wildlife Institute of India, Dehradun Uttarakhand, India**

**Topic: Wildlife Monitoring in Antarctica**

**WEBINAR on CARE to BIODIVERSITY**

**Dr. Anant Pande, Scientist  
Wildlife Institute of India, Dehradun  
Uttarakhand, India  
Team member Antarctica Expedition  
Team Lead - Indian Polar Research Network  
Topic: Biodiversity of Antarctica**

**Organised by: ENVIS RP on Environmental Biotechnology,  
University of Kalyani**

He discussed on the wild life available in the Arctic, Tropical mountain peaks and Antarctica regions and also the marine ecosystem. Elaborate the wildlife monitoring methodologies in Antarctica region. The importance of different wild life to the Antarctic ecosystem and their vulnerability were discussed showed with beautiful slides. The interesting Penguin habitats, birds, seal, shark, whale and landscape were beautifully presented in his lecture.

## Vulnerable Species

### Lecture-III

Dr. Neera Sen Sarkar,

Dept. of Botany, University of Kalyani

**Topic:** Corona pandemic effect on biodiversity

**WEBINAR on CARE to BIODIVERSITY**

**Dr. Neera Sen Sarkar**  
**Dept. of Botany, University of Kalyani**  
**Topic: Corona Pandemic Effect on Biodiversity**

**Organised by: ENVIS RP on Environmental Biotechnology, University of Kalyani**

Dr. Sarkar discussed about the total collapse of ecotourism during the pandemic implies decrease in generation of tourism revenues utilised all over the world for conservation. Human health and containment of the pandemic being high priority research, conservation research is unlikely to be government priority during post pandemic times. Looming global economic recession will reduce funds available to governments and conservation foundations and potentially reduce fund for biodiversity issue.

WEBINAR on CARE TO BIODIVERSITY organized by ENVIS RP on ENVIRONMENTAL BIOTECHNOLOGY, UNIVERSITY OF KALYANI

## Lecture-IV

**Dr. Punarbasu Chaudhuri,**

**Dept. of Environmental Science, University of Calcutta**

**Topic: Mangroove Biodivesity of Indian Sunderbans**

**WEBINAR on CARE to BIODIVERSITY**

**Dr. Punarbasu Chaudhuri**  
**Dept. of Environmental Science**  
**University of Calcutta**  
**Topic: Mangrove Biodiversity**

**Organised by: ENVIS RP on Environmental Biotechnology,**  
**University of Kalyani**

Mangrooves are plants that grow at the interface between land sea/estuary mainly in tropics and sub-tropics. He beautifully discussed the details of mangrove ecosystem and its unique characteristics with the example of Indian Sunderban. Elaborate the global and Indian distribution of mangroves. The different flora and fauna (macro and micro) diversity in mangrove region were presented in his lecture. He highlighted on the dwellers of these area and their livelihood development with sustainable use of the mangrove resources. He also discussed different threats to the mangrove ecosystems and their conservation options.

Celebration of world Environmental Day 2020

Webinar on Care to Biodiversity

## Mangrove Biodiversity of Indian Sunderban

Organized by

ENVIS RP on Environmental Biotechnology, University of Kalyani

5<sup>th</sup> June 2020

by

**Punarbasi Chaudhuri,**  
Department of Environmental Science  
University of Calcutta

**Sundarbans ≈ Sundar + Bans = Beautiful Forest**

**Largest Mangrove forest of the world**

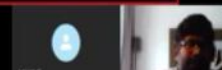

### Conservation Status of Sundarban

- Sundarban Tiger Reserve (STR) Since 1973
- 3 wild life sanctuaries Since 1976
- National Park Since 1984
- UNESCO World Heritage site Since 1989
- Biosphere reserve Since 1989
- Ramsar Site Since 2019

**It is the only mangrove Tigerland of the world**

Department of Environmental Science, University of Calcutta

## Lecture-V

**Dr. Shubhransu Nayak, Odisha Biodiversity Board**

**Topic: Biotechnology Boosts Biodiversity Conservation**

Dr. Nayak beautifully discussed about the advance information on how biotechnology boosts the biodiversity conservation in in-vitro & in-vivo way his lecture. Biodiversity is the variability among living organisms from all sources including inter alia terrestrial, marine and other aquatic ecosystems, and the ecological complexes of which they are part; this includes diversity within species, between species and ecosystems. He pointed on different threats to biodiversity. Elaborate on different advance biotechnological tools like, tissue culture, gene bank, cryopreservation, Recombinant DNA technology, transgenic technology, GMO, DNA barcoding with their advantage and limitations for conservation of biodiversity. The intellectual property right (IPR) and farmers right laws were highlighted in his lecture.

# BIO TECHNOLOGY BOOSTS BIODIVERSITY CONSERVATION

## WEBINAR on CARE to BIODIVERSITY

5th June, 2020 (World Environment Day- 2020)  
Organized by ENVIS RP on Environmental Biotechnology,  
University of Kalyani, West Bengal

**Dr. Shubhransu Nayak**  
Odisha Biodiversity Board  
Bhubaneswar

## Application of DNA barcodes in wildlife conservation

- Scientists and investigators are increasingly turning to cutting edge DNA barcoding technology in their fight against illicit wildlife trafficking.
- Genetic monitoring of tiger source populations is a conservation priority.

## Concluding lecture

**Dr. Anusaya Mallick,**  
**Programme Officer, ENVIS RP on Environmental Biotechnology,**  
**University of Kalyani**

**WEBINAR on CARE to BIODIVERSITY**

- The Ministry of Environment and Forests (MoEF&CC) has implemented the National Environmental Information System (NEIS) for the retrieval and dissemination of environmental information.
- The purposes of ENVIS are to provide information on environmental subject related to the Government/ UT Administrations.
- Environmental Information System (ENVIS) was established in the year 1984 as a national level network of environmental subject related to the Government/ UT Administrations.
- The network presently consists of 31 Centres which deal with environmental information at the Government/ UT Administrations.
- Remaining 35 Centres are to be established in the Governmental and non-Governmental organizations.
- The ENVIS Centres form a national network and deal either with a particular State/UT (general Thematic Centres) or have a specific environmental theme.
- ENVIS is a project of the Ministry of Environment and Forests, Government of India.

**Dr. Anusaya Mallick, Programme Officer**  
**ENVIS RP on Environmental Biotechnology**  
**University of Kalyani**  
**Concluding & Vote of Thanks**

**Organised by: ENVIS RP on Environmental Biotechnology,**  
**University of Kalyani**

### Concluding and vote of Thanks

From this web seminar we enriched about the biological diversity of plants and animals and its environmental aspects. The biodiversity is decreasing day by day due to various reasons. If it does not stop then our earth could no longer be a place to live in. Therefore different measures help in increasing the biodiversity of the earth. Biodiversity in flora and fauna is the need of the hour. Therefore we should take various countermeasures to stop the reduction of endangering of species. Furthermore, pollution from vehicles should decrease. So that animals can get fresh air to breathe. Moreover, it will also decrease global warming which is the major cause of the extinction of the species. Biodiversity is an issue that affects everyone and therefore everyone should be aware of their effect on biodiversity. The continuous decreasing of the biodiversity will be threats to the future human survival. Therefore, we should care to the Biodiversity.

Initially the ENVIS coordinator Prof. Ashis Kumar Panigrahi welcomed to speakers and participants. The Hon'ble Vice Chancellor, University of Kalyani, Prof Sankar Kumar Ghosh was inaugurated through his valuable talk. The eminent speakers from different locations talked in the seminar on various aspects of biodiversity. It is our pleasure that over 2000 participants from all over the world, majorities from Asian countries and some are from USA, EUROPE and Australia were actively participated in the seminar. Their queries also answered by our experts.

Thanks to all for your patience to present in the web seminar. First I thanks to our Hon'ble Vice Chancellor to give his kind permission for conducting this webinar and also inaugurating the seminar. Thanks to our coordinator, Prof. Ashis Kumar Panigrahi who guided us and give his valuable suggestions time to time. Thanks to the ENVIS secretariat and their staffs for encoring us and also thanks to the Ministry of Environment, Forest and Climate Change for sponsoring the seminar.

Thanks to our eminent speakers for giving their valuable lectures. Thanks to Hon'ble Vice Chancellor, University of Burdwan, Prof. Saha for his talk on **Effect of COVID-19 on Environment**. Thanks to Dr. A.K Sanyal , Chairman Biodiversity board for his informative lecture on Status of Biodiversity in India.

Thanks to Dr. Anata Pande, scientist, Wild Life Institute of India, Derhadun and three times participated in Antartica Expedition for his informative lecture on Biodiversity of Antartica. He accepted our invitation during his stay in Capetown on return from Antartica Expedition due to lockdown of corona pandemic.

Thanks to Dr. Neers Sen Sarkar, Dept. of Botany University of Kalyani for her relevant lecture on Corona Pandemic Effect on Biodiversity.

Thanks to Dr. Punarbasu Chouhdhury from University of Calcatta for his lecture on Mangrove Biodiversity, Who was also detained in quarantine after his Antartica Expedition.

Thanks to Dr Subhranshu Nayak, Odisha Biodiversity Board for his theme based informative lecture on Biotechnology Boost Biodiversity Conservation.

The E-certificate of the participants will be sent in their respective mail. As the number of participants is very high, it will take time to distribute the certificate to all. Please mail us if you will **not** receive the certificate within one month of the seminar. For any further query all are requested to send us mail, which will be responded at our best.

Thanks to our ENVIS staffs, Mr. Sourov, Banerjee, Mr. Tanmoy Acharjee and Mr. Subhaum Dutta. Last but not least Thanks to all who are directly or indirectly involved and make success of the web seminar.

## Photo gallery

## BIODIVERSITY - FRUITS OF EVOLUTION

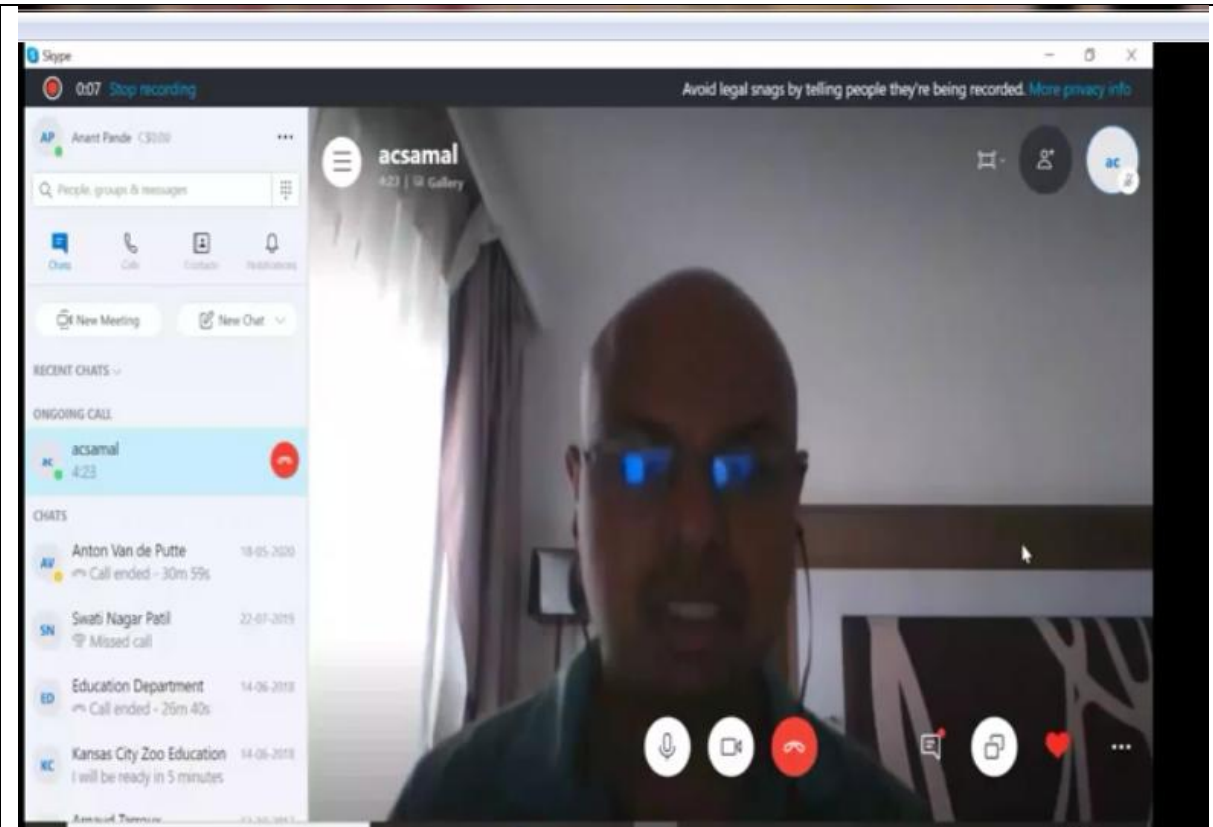

THE EARTH CAME TO ITS EXISTENCE ABOUT 4.6 BILLIONS OF YEARS AGO.

IT TOOK NEARLY 1 BILLION YEARS FOR THE FIRST LIFE FORM TO APPEAR.

SINCE THEN LIFE HAS PROLIFERATED IN ITS AMAZINGLY DIVERSIFIED FORMS INTO ALL NOOKS & CORNERS.

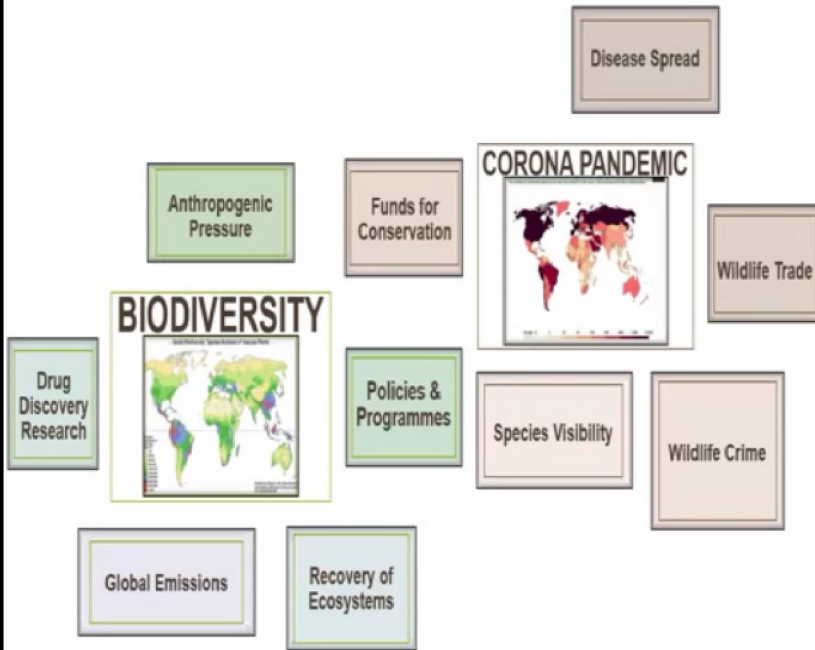

THESE AMAZING LIFE FORMS INCLUDING PLANTS & ANIMALS, MICROBES, THEIR GENETIC DIVERSITY AND EVEN DIVERSITY OF THE ECOSYSTEMS THEY OCCUPY TOGETHER CALLED BIODIVERSITY.

## New Adelie penguin colony identified

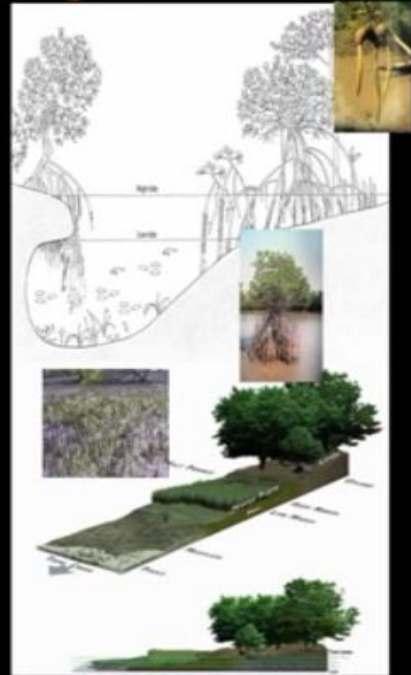

## Drug Discovery Research

- Millions of people around the world under quarantine.
- World economy has never witnessed such impact of a disease.
- No proven treatment or prophylactics for COVID 19 exists.
- Search for suitable drugs and vaccines are research priorities.
- Screening biodiversity resources for the same will prove instrumental in taking care of the deadly virus.

## Unique characteristics of mangroves:-

- Grow in muddy substrata having tidal influences
- Have aerial negatively geotropic roots for respiration.
- They can excrete salt
- They have viviparous seeds

[http://en.wikipedia.org/wiki/File:Salt\\_pannes\\_and\\_pools\\_high\\_and\\_low\\_tide.jpg](http://en.wikipedia.org/wiki/File:Salt_pannes_and_pools_high_and_low_tide.jpg)

# Threats to Biodiversity

Poaching

Forest fire

Excessive application of fertilizer

Invasive species

Monocropping

Nonjudicious application of pesticides

01:24:27

**Cryopreservation** is one of the biotechnological method of *ex situ* conservation for long term storage of genetic material. Cryopreservation is extremely helpful method to conserve rare, endangered, threatened plant and animal species by preserving seeds, propagules, meristematic cells, semen, oocytes, embryos in low and ultra low temperatures.

Successful hybridization with cryostored pollen of Taro and germination of seed

**Gene Bank:** A physical repository where samples of a genetic resource are preserved such as live animals, embryos, oocytes, semen, tissues, seeds, cells, whole plant or plant parts, DNA samples, etc.
